- Ready to Install Out-of-Box

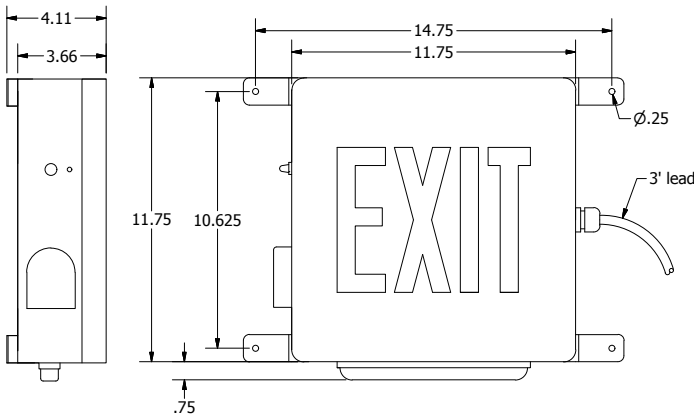

**LIGHTING ETC.**  
INCORPORATED

## Product Overview

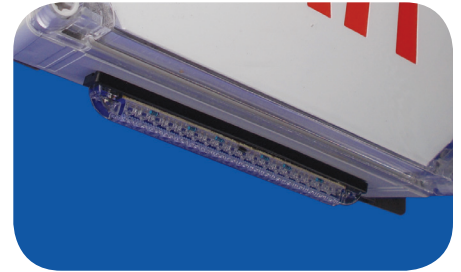

The **EL Series** exit sign is designed for heavy hose-down and wet location environments. The unique design can satisfy both exit and emergency lighting requirements. The **EL Series** can be configured as a self-powered, AC only exit sign or a combination self-powered AC with emergency battery back-up exit sign. The exclusive DOWNLIGHT option can be configured to illuminate the egress area in both the AC or emergency modes. The **EL Series** exit signs ship completely assembled and ready to install out-of-box making it a maintenance friendly product ideally suited for food processing plants or any other wet or corrosive application.

## Dimensions

## Downlight Feature

The downlight feature utilizes an 8" water resistant LED strip to illuminate the egress area. Unlike other exit signs with external heads that are easily broken during hose-down or clean-up operations, the low-profile emergency LED downlight strip is installed on the bottom of the fixture which allows for easy cleaning and maintenance.

## Catalog Logic

Item Description	Downlight	Voltage	LEI Catalog No.
Emergency Exit Sign with <b>EMERGENCY</b> Safety Egress Downlight	8" Water Resistant LED Strip	120	EL-LED-EDL-12R
