**LIGHTING ETC.**  
INCORPORATED

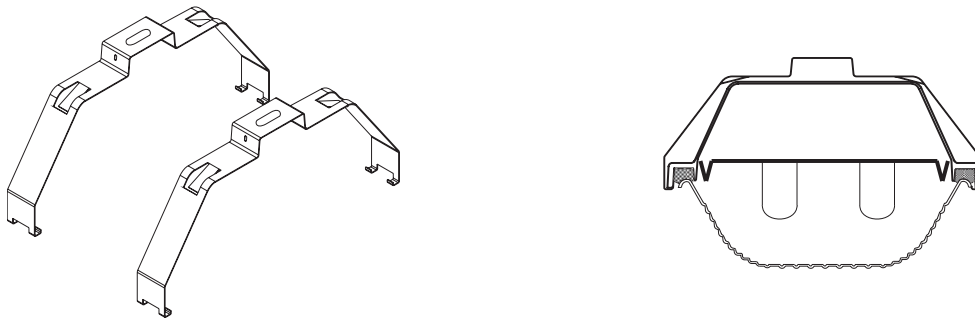

## Product Overview

The **VG Series** is a non-metallic luminaire for use in harsh and wet environments where constant humidity or moisture is present. Offered in T5 and T8 configurations, the **VG Series** is an energy efficient alternative to older, T12 fluorescent products. The **VG Series** is comprised of a heavy duty one piece housing and a high impact resistant lens which is held in place on a poured in, closed cell gasket by plastic or optional stainless steel captive latches. Optional ribbed lens is available. The **VG Series** is available in 2', 4' and 8' lengths with options for 1, 2, 3, 4, and 6 lamp configurations. Food processors, breweries, dairies, parking garages and car washes are just a few areas that can benefit from the **VG Series**.
