Hand Assembled in Pearland, Texas

**CIRCULAR
SUSTAINABILITY™**

LEI Circular Sustainability Program

LEI has been serving the USA and has been handcrafting custom lighting fixtures and exceeding customer expectations in Texas with great pride for over 25 years.

LEI, then and now, continues to lead the way by creating environmentally friendly LED solutions.

Now, we are leading the way in Sustainability, by making available the new LEI "Circular Sustainability" Program. This program recognizes "End of Life" LED lighting fixtures before their expiration, with a plan to outfit those units with the latest technology and repurpose them back into the field. Therefore, helping save the environment, through reduction of the landfill contribution, CO2 emissions and potential energy consumptions. Last, but not least, providing significant cost savings versus new fixture expenditures.

Select the customizable "Tier Level Solution" for each facility that currently already possesses these units, with a consultation from a LEI Regional Sales Manager, we can become sustainable together.

Think GREEN and think LEI.

How It Works

- 01** Customer picks which repurposing package they desire.
- 02** Customer sends the fixture back to LEI
*Please see approved shipping methods.
- 03** Fixtures are sent back to the customer to last for years to come.
*2 to 3-week lead time

CS Package Tiers

- 01** Lens & Power Supply Driver Replacement
- 02** Lens, Power Supply, LED's & PCB Board Replacement
- 03** Lens, Power Supply Driver, LED's, PCB Board & Powder Coating

CS Benefits

- 01** Reduced Landfill contribution by approximately 80%
OPT
- 02** Saving Co2 Emissions
- 03** Increased Fixture Efficacy
- 04** Cost Reduction by 40% or more vs. buying a New Fixture
